analyzed more than
300,000
times a
year

The numbers make it clear.

Ninety percent of the valley's water comes from Lake Mead. But the journey between there and your faucet may surprise you.

Traveling through 6,500 miles of pipeline, your water is analyzed more than 300,000 times a year, treated and monitored 24/7 by a team of scientists, engineers, and technical experts. All to ensure your water meets or surpasses the highest quality standards, delivered daily to the one place that matters most: Your tap.

For objective information about water quality and in-home treatment systems, visit snwa.com.

The SNWA is a not-for-profit water agency.

The Dawson Difference

**We prepare our graduates to thrive no matter
which path they choose in life.**

The return on investment of a Dawson education is not measured simply by a diploma, but by an educational experience that prepares our graduates to thrive no matter which path they choose in life. Here, students achieve their individual potential while savoring life and meeting the challenges of the world.

Healers. Game Changers. Comprehensive.

A real team player can change the game. But cancer isn't a game.

It's a battle, where having top performers on your team can mean everything. Professionals who give their all to apply every known treatment, both existing and emerging, to help you in your battle against cancer.

Comprehensive participates in more than 170 Phase I, Phase II and Phase III clinical research studies each year. From novel treatments like genomics which fight cancers caused by genetics, to immunotherapy which uses the body's own immune system to attack and beat cancer, Comprehensive will put together the team and the treatment plan that could make all the difference. Visit our website to learn more.
